# TrackMan

At Santo Estêvão Golfe, we believe that improving our quality of play and our performances requires frequent work on the Driving Range, and understanding the characteristics of your swing, and each of your clubs.”

"In this regard, Trackman allows:

- To know the basic data of your game (average distance of each club, swing speed, APEX...)
- To compare various types of clubs and shafts (fitting)
- To improve your performances (work in terms of angle of attack, Spin, club path, etc...)

To train with defined or random objectives - distance and flag position - (Test center)"

A scenic view of a golf course under a dramatic, cloudy sky. In the foreground, a well-maintained green is visible with a yellow flag on a white pole. To the left, a calm pond is bordered by tall reeds. The background features a line of trees and some buildings, suggesting a clubhouse or resort area.
